EP

NeMus: entry level solution

Frequent upgrades

Software developed in house subjected to frequent updates.

Flexibility

High performance devices capable of recording with the best accuracy: EMG, NCV, Evoked Potentials, EEG, Video EEG, ICU Monitoring dedicated program.

Modular solutions

Able to host a complete neurophysiological laboratory in its small headboxes with a wide selection of accessories.

Total Control

Thanks to specific shortcuts, systems can be managed using the PC keyboard or the dedicated one especially for lone workers and in small spaces.

NeMus 2: advanced solution

NExT

The new Galileo NT Line applicative software for EMG/NCV/EP

Fully customizable

You can totally set the software design, from **background color** to **work area layout** to **report templates managing**.

Easy to use

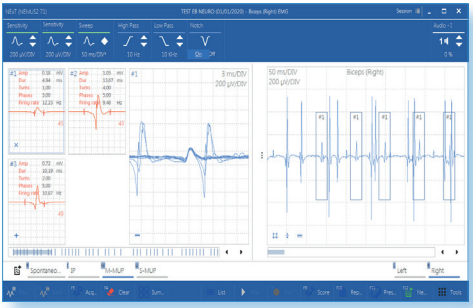
It **helps** you with **complex exams** such as MultiMup analysis, which can be managed in automatic, semiautomatic or manual way.

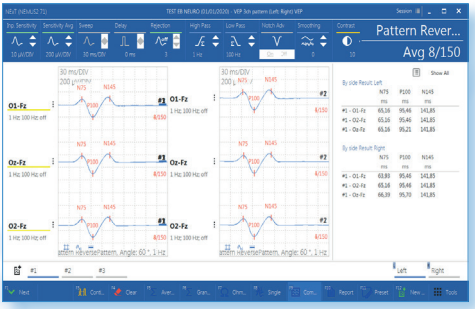
Multitasking and smart with features like

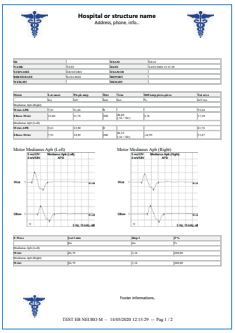
- the **advanced comparison** and the differential **measures in real time** during EP exams;
- **quickly swipe side**;
- consult the **customizable anatomic atlas**;
- the **History**, where you can select the best acquired potentials even if already canceled;
- the **EP raw data storing** designed to allow a complete signal post-processing.

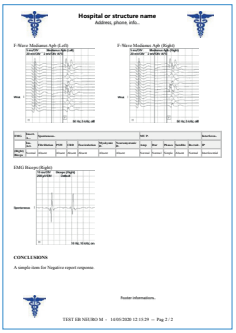
Unlimited Report Templates!

Several programs for every neurophysiological investigation!









ACCESSORIES

The **Handheld** with multifunction buttons to set and control the stimulation and to manage the acquisition.

A pair of high-quality **Speakers** to ensure the maximum audio signal fidelity.

The easy **Footswitch** to work in the best comfort.

The **Bluetooth Keyboard** to gain total control of the examination, even remotely in wireless connection.
